

ABDUL WAQAR

Artificial Intelligence Engineer

+92 310 3323825 | abdulwaqarmangrio@gmail.com | github.com/abdulwaqar20 | Karachi, Pakistan

SUMMARY

I am a BS Computer Science (Specialization in Artificial Intelligence) graduate from NED University. I have hands-on experience in Machine Learning, Deep Learning, Computer Vision, and NLP. I am skilled in Python, SQL, and React Native, and I have completed internships at KDA, NIKUD, PIA, and PCSIR. My projects include Hate Speech Detection, a Smart Parking system using YOLO, and a Library Recommendation System. Certified Generative AI Developer and participant at Indus AI Week 2026.

SKILLS

- Machine Learning:** Machine Learning, Deep Learning, Computer Vision, Natural Language Processing (NLP), Image Processing, YOLO, OpenCV, Data Mining
- Languages & Frameworks:** Python, C, C++, SQL, React Native, Node.js, Streamlit, HTML, CSS
- Tools & Cloud:** Git, GitHub, Firebase, Databases (Pandas, NumPy, Database Management)
- Core Competencies:** Problem Solving, Team Collaboration

CERTIFICATIONS AND ACHIEVEMENTS

- Generative AI Application Developer Training - NCEAC-HEC (iCodeGuru, PakAngels, Aspire Pakistan, UETIANS Lahore) | 2026
- Python Programming - edX | 2025
- Indus AI Week - NYLP | Feb 2026 - Participated in a 3-day national conference covering AI advancements, Women in AI, AI for All, and Youth in AI

EXPERIENCE

Karachi Development Authority (KDA) - IT Department Intern

Mar 2025 - Apr 2025

Karachi, Pakistan

- Handled technical tasks and IT operations within the Information Technology Department.
- Supported daily departmental functions and system maintenance alongside the IT team.
- Received recognition for capable and responsible performance throughout the internship.

NIKUD - React Native and Full Stack Intern

Jul 2025 - Aug 2025

Karachi, Pakistan

- Developed a cross-platform mobile application using React Native and Firebase for iOS and Android.
- Built an Admin Dashboard using Node.js for real-time data visualization and user management.
- Integrated RESTful APIs to connect the mobile app with the backend dashboard.
- Implemented Firebase Authentication and Realtime Database for enhanced security and data retrieval.

Pakistan International Airlines (PIA) - React Native Intern

Aug 2024 - Sep 2024

Karachi, Pakistan

- Developed cross-platform mobile applications using React Native and Firebase.
- Implemented real-time database integration for improved app responsiveness.
- Collaborated with senior developers to debug and optimize code, reducing app crashes.

Pakistan Council of Scientific and Industrial Research (PCSIR) - Data Analyst Intern

Sep 2023 - Oct 2023

Karachi, Pakistan

- Performed data cleaning and preprocessing on large datasets, handling missing values and inconsistencies.
- Improved data accuracy through systematic validation and outlier detection.
- Assisted in data mining tasks to increase reporting efficiency.

PROJECTS

Hate Speech and Cyberbullying Detection | Python, NLP, Scikit-learn, Streamlit

- Built an AI classifier for Hate Speech, Cyberbullying, or Neutral text using TF-IDF and Logistic Regression (82% accuracy, 93.8% precision for hate speech).
- Combined machine learning with rule-based keyword filtering for low-confidence cases.
- Developed an interactive Streamlit app with real-time analysis, confidence scores, and confusion matrix visualization.

Smart Park - Object Detection for Parking Space Monitoring | Python, YOLO, Streamlit

- Built a real-time parking space monitoring system using YOLO to classify filled and empty spaces in images and video.
- Implemented confidence thresholding and color-coded bounding boxes for intuitive visualization.
- Deployed via a Streamlit interface supporting media upload and real-time detection.

Library Recommendation System | Python, NLP, TF-IDF, Streamlit

- Built a content-based book recommendation engine using TF-IDF vectorization and cosine similarity on book descriptions.
- Integrated fuzzy matching to handle user input typos and spelling errors.
- Deployed as a Streamlit app with Plotly visualizations for top recommendations by rating.

Heart Disease Prediction | Python, Scikit-learn, Logistic Regression

- Built a binary classification model on the UCI Heart Disease dataset; achieved ROC-AUC of ~0.88.
- Identified chest pain type and max heart rate as key predictors through EDA and feature scaling.

Stock Price Prediction (AAPL) | Python, Linear Regression, yfinance

- Developed a short-term stock price prediction model using historical Apple data from Yahoo Finance.
- Used Open, High, Low, and Volume features to predict next-day closing price with Linear Regression.

General Health Query Chatbot | Python, Groq API, LLaMA 3.1

- Built an interactive command-line chatbot using LLaMA 3.1 via Groq API.
- Applied prompt engineering for friendly responses and safety filtering to prevent medical diagnosis.

EDUCATION

NED University of Engineering and Technology

Bachelor of Computer Science - Specialization in Artificial Intelligence
CGPA: 3.17

2022 - 2026

Karachi, Pakistan

Govt. Degree Science/Commerce College, Gulshan-e-Iqbal

Intermediate - 81.09%

2020 - 2022

Karachi, Pakistan

Everest Grammar High School

Matriculation - 82.5%

2018 - 2020

Karachi, Pakistan

LANGUAGES

- English – Intermediate
- Urdu – Native
- Sindhi – Native
